AMENDMENT TO OU-4 IM/IRA DECISION DOCUMENT - EML-183-93

In granting DOE's requested amendment to the IM/IRA Decision Document, the regulators included two public information requirements EG&G Rocky Flats has prepared the necessary instruments to fulfill these requirements as follows

- Inform the public of the amendment in the next monthly newsletter

With your verbal approval, we have transmitted the amendment information to EG&G Rocky Flats Community Relations We expect the information will appear, as requested by the regulators, in the next newsletter

- Insert a copy of the DOE request for amendment and regulator response into each official copy of the IM/IRA

Attached is a list of official copy holders, as defined by the original distribution to reading rooms and individuals Also attached is a draft transmittal package for your use

If you prefer, you may return DOE's signed cover letter to the EG&G Solar Ponds Remediation Project office, and we will provide distribution of the amendment package Although the regulators did not specify a due-date for these transmittals, it seems appropriate to complete the transmittals prior to diversion of the trench water on April 16, 1993

If you would like to discuss this transmittal further, please contact me or Kathy London, extension 8585

DISTRIBUTION

AMENDMENT TO THE ROCKY FLATS INTERIM MEASURE/INTERIM REMEDIAL ACTION DECISION DOCUMENT FOR THE SOLAR EVAPORATION PONDS OPERABLE UNIT NO 4, APRIL, 1992

DOE has requested and received an amendment to the IM/IRA Decision Document noted above. Our records indicate you received a copy of the original issue of the IM/IRA Decision Document. For your information, attached are a copy of DOE's request for amendment and EPA's and CDH's concurrence.

The IM/IRA Decision Document documented a remedy to cease treating water from an Interceptor Trench System, which collects ground water contaminated with hazardous constituents, in open solar evaporation ponds and divert that water to storage tanks and evaporation facilities. In these facilities, the trench water will be evaporated, and the distillate condensed and used in place of purchased raw water in the plant's utilities systems. The amendment to the IM/IRA Decision Document is within the intent of the original issue, and provides additional flexibility to facilitate DOE's efforts to meet the IM/IRA objectives. The schedule for commencing this operation has slipped from the schedule included in the IM/IRA Decision Document. However, we are currently on track toward meeting a revised diversion date of April 16, 1993.

Please insert the attached amendment letters in the front of your copy of the IM/IRA Decision Document. DOE appreciates your interest and participation in this IM/IRA process. If you have questions or comments, please contact Beth Brainard on 966-5993.
